

QA/QC Engineer

Scope: (Quality Management systems and quality operations)

South of Zurich, Switzerland

Contact: tamanna@elemed.eu

Are you looking to join a growing company and play a critical role within their quality department?

Do you enjoy working on testing and managing the manufacturing side of things?

Do you want to work for an inclusive company where you will be part of a close knit team?

If yes this is the role for you...

The company

In this role, you will work for an innovative and bold startup with a revolutionary medical device. This startup is well backed financially; meaning that this is a great chance to benefit from all the excitement of joining a clinical stage startup, with minimal risk.

That means; a highly dynamic environment, fast moving decisions, a seat at the table to help drive the direction of the company and the chance to really leave your mark in an extremely fulfilling role.

With big ambitions to enter the US market, this company is looking for their new QA/QC Engineer to join their business at their exciting point of growth.

The role

Within this role your responsibilities will include but not be limited to:

- Be part of developing and driving forward key quality control processes within the business
- Performing key mechanical testing for both the end product and components in order to collect key data for the R&D department
- Work closely with the head of QA to perform incoming inspections
- Be the key owner on all equipment testing and data evaluation
- A key support within both internal and external audits
- Play a key role within the quality department to drive forward validation activities and work closely with the QMS

We are looking for

- 3+ years of experience within quality control and quality engineering from the medical device industry
- Previous experience within incoming inspections
- Have already gained experience in handling and managing key quality control processes
- Key understanding of ISO 13485
- Any previous experience of working with the FDA would be a bonus
- Strong communication skills in English. Fluency in German would be an advantage
