THE COMPANY

Are you looking to strengthen your experience in Design Verification Engineer and take the next step in your career?

We have a fantastic opportunity to share with you to join a leader of medical devices in their field. This is a company that has a real international presence, with a number of subsidiaries in different countries as well as strong global exportation.

As a Design Verification engineer, you will be based in their main site, which means being at the very heart of the decision-making and the company operations, so you will be in the ideal place to influence the business.

THE COMPANY

Working at this company, you'll enjoy working with cutting-edge technologies. You also be able to see how this technology is used during surgeries. They have new projects in their pipeline so this role is key to helping them, and you will have a lot of influence.

This is a new role created to help the Project Managers to focus on everyday tasks. So you will be there to support them in the development of new products.

You will report to the R&D Manager, and you will be part of the Technology Development department. Working at this company, you'll get to learn from the best of the best professionals in the industry. This is not an opportunity to miss out on!

RESPONSIBILITIES

- Design control
- Reviewing and writing of design control documentation (DHF content)
- Risk management files
- Validation and verification of the software

QUALIFICATIONS

- Experience in participating in DHF
- Experience in risk management
- Experience working with software is a plus
- English writing ability
